Greg –

See below – it's a new (federal) fiscal year, so we have a new case number for the Riverside Ag samples (**R17R01**)

Thanks-
Kathy

Hey, Susan –

See info below from Greg Neal at DTSC. Expect about 9 to 12 soil samples next week, the probably 8 more in late January(?). Hopefully by then, this project will (finally) be done.

Thanks for your help with this project – please let me know if you need more information-

Good morning,

Yes I am planning to send samples. I have been accumulating them so that I can send at one time. I think we are in the 9 to 12 range on sample numbers per the 1 per week discussion we had a while back (9 weeks plus maybe an extra here and there early on). I will send them to the lab probably next week. As for ongoing sampling, it will probably account for 4 to 8 additional samples at one per week based on our original estimate of time. I'll check in with our team to get the conversation started.

Thanks for your help
greg

Hey, Greg -

Are you planning to send another batch of Riverside Ag Park samples to the EPA Region 9 Lab? It's not a problem - they just need to know for sample throughput purposes.

Also, on that subject, Sara mentioned that excavation/re-sampling is expected to go on through January. Will you continue to collect split samples for EPA Lab analysis? We're fine either way, but that's probably a decision that Maryam/Dot/SteveA/Sara might want to weigh in on.

Thanks-
Kathy

Hi Kathy.

Should the Region 9 Lab still expect soil samples this month from this Riverside Ag Park event?

Susan -

Case R16R01 (Riverside Agricultural Park) will continue. DTSC will continue to collect one or two soil samples per week over the next two months of field work, and then send the group of samples (likely one SDG) to the R9 Lab by around mid-October. We will let you know if this schedule changes. Thanks for your help with this project-

Kathy
